

Vaccine Distribution

Alex A. Clerk, M.D.

12/12/20

California plan

California's vaccine distribution plan is broken up into six regions, based on the state's vaccination protocols.

The Bay Area falls under Region II, an area made up of 16 counties, and is expected to receive 80,497 doses of the vaccine.

The distribution plan is sub-prioritized into three tiers.

Tiers in Distribution

Tier 1. It prioritizes those work in acute care, psychiatric, and correctional facility hospitals, skilled nursing, and assisted living facilities, as well as paramedics, EMTs, and dialysis centers.

Tier 2 prioritizes intermediate care facilities, home health & supportive services, community health workers, public health field staff and primary care clinics, including rural health centers, correctional facility clinics and urgent care clinics

Tier 3 prioritizes other healthcare settings like specialty clinics, laboratory workers, dental or oral health clinics, and pharmacy staff not working in settings at higher tiers.

Region I: 126,750

Los Angeles

Orange

San Diego

San Luis Obispo

Santa Barbara

Ventura

Region VI: 59,910

Imperial

Inyo
